SUMMARY

Full Stack Developer with a solid foundation in Python, Django, FastAPI, and React.js, adept at building scalable web applications. Independently developed and deployed a responsive e-commerce platform using ReactJS and a full-stack blogging platform with Next.js and MongoDB, featuring dynamic content management and an admin dashboard. Seeks to apply a strong understanding of modern web technologies and AI fundamentals to solve real-world challenges and contribute to innovative software development.

SKILLS

Programming Languages: Python, Java, JavaScript

Frontend Development: ReactJS, Next.js, Bootstrap, Vite, React Router, HTML5, CSS3

Backend & APIs: Django, FastAPI, REST APIs

Databases & Querying: MySQL, MongoDB, SQL

AI & Machine Learning Fundamentals: Generative AI, Prompt Engineering, Responsible AI

Development Tools & Methodologies: Git, GitHub, Visual Studio Code, SDLC, Component-Level Design, Application Design Patterns, Manual Testing, Code Review, MS Word, Excel, PowerPoint

Libraries: Numpy, Pandas, Matplotlib

PROJECTS

E-Commerce Web Application

- Designed and developed a fully responsive e-commerce application following component-level design patterns.
- Implemented product listing, search, and category filtering features aligned with application design requirements.
- Integrated React Router for seamless client-side navigation, adhering to routing design standards.
- Ensured code quality by manually testing all features against multiple use-case scenarios.

Blogging Web Application

- Developed a full-stack blogging platform using Next.js, MongoDB, and REST APIs, enabling dynamic blog creation, management, and content delivery.
- Built an Admin Dashboard with blog management features, including blog listing, content administration, and deletion functionality.
- Implemented an Email Subscription System with an admin panel to manage subscribers and enhance user engagement.

EDUCATION

Sri Srinivasa Degree College
